SUMMARY

Bachelor of Computer Science (Computer Network Security) undergraduate at Universiti Sultan Zainal Abidin (UniSZA) that passionate about Computer Security, Penetration Testing, Digital Forensics and Internet of Things (IoT). Have a strong foundation in IT hardware troubleshooting and network fundamentals. Eager to explore roles that related to Computer Network Defense, Penetration Testing, Security Operations and Digital Forensics. Willing to give full dedication, commitment, and discipline to work well. Love to learn and gaining new knowledge.

EDUCATION BACKGROUND

Universiti Sultan Zainal Abidin (UniSZA), Current CGPA: 3.79 Dean list Sem 1-5 (2023 - Now)

Bachelor of Computer Science (Computer Network Security) With Honours

Current Semester: Semester 6

Major: Networking and Security

Minor: Programming and Systems

Politeknik Sultan Mizan Zainal Abidin

(2019 - 2022)

Diploma in Electronics Engineering (Computer)

CGPA: 3.52

Major: Electronics and Computer Engineering

Minor: System Maintenance and Networking

WORK EXPERIENCE

Night Electronics (M) SDN BHD

(August - October 2022)

Technician

- Performed internal repairs and troubleshooting for IT hardware including laptops, personal computers, and printers.
- Conduct preventive maintenance.

CERTIFICATE

- CCNA: Switching, Routing, and Wireless Essentials

LANGUAGES

- **Bahasa Melayu:** Native
- **English:** Proficient

SKILLS

- | | | |
|---------------------------|------------------------|--------------------------------|
| • Programming (Java, C++) | • Embedded Systems and | • Penetration Testing (Novice) |
| • Network Analysis | Microcontroller | • Wireshark (Intermediate) |
| • Linux | programming | • Microsoft Office |

SOFT SKILLS

- | | | |
|-------------------|----------------|----------------|
| • Time management | • Fast learner | • Team-working |
|-------------------|----------------|----------------|

LEADERSHIP AND CO-CURRICULAR INVOLVEMENTS

Exco Module Development | Robotic Club (RoboPro), UniSZA 2023

- Designing hands-on module with teams for learning and programs usage covering sensor integration with basic automation.

Vice President | Robotic Club (RoboPro), UniSZA 2024 – Present

- Involved in managing and planning club strategy and technical workshops.
- Mentoring junior members in microcontroller programming.
- Conducting IoT and Embedded System workshops for primary and secondary schools.

Minggu Penyelidikan dan Inovasi, MPI 2024 (Bronze Medal)

- Showcased an innovative project to panels of industry experts and lecturers.
- **Project:** SafetyInfant - An infant car seat that integrated with IoT that will perform automation call and SMS when baby is left inside a car with engine off. This project aim to prevent a baby is left behind inside a car that can lead to death.

Capture The Flag, CTF UniSZA - UMT 2024 (3rd Place)

- Performed analysis using various security tools (Wireshark, Autopsy) to find flag.

Minggu Penyelidikan dan Inovasi, MPI 2025 (Bronze Medal)

- Showcased an innovative project to panels of industry experts and lecturers.
- **Project:** SortBuddy - An automation trash sorter that using AI to classify trash type.

MRANTI Robothon 2025 (Semi Finalist)

- Showcased an innovative project to panels of industry experts.
- **Project:** SortBuddy - An automation trash sorter that using AI to classify trash type.

Virtual Innovation Competition, VIC 2025 (Gold Medal)

- Performed video presentation for SortBuddy project.

Capture The Flag, CTF UniSZA - UMK 2025

- Performed analysis using various security tools (OpenStega, HexEditor, ExifTool) to find flag.

PROJECT

- **Long Grass Detector** - IoT project covers integration of sensors with application dashboard (Blynk).
- **AI Image Detector** - Current degree's Final Year Project. Developing a CNN-based system that can detect AI generated image via forensic features.
- **SortBuddy** - An autonomous, AI-driven recycle bin that auto sort trash based on the type.
- **SafetyInfant** - IoT-based child safety system using TTGO and sensors to detect baby availability that automate emergency SMS and voice call notifications triggered by the vehicle's engine shut-off.
